

HOST Dry Extraction Carpet Cleaning System has gone through decades of research. Whatever claims we make, we do with confidence. As a result of the investment in this research and testing, the following has been accomplished:

- The WoolSafe Organization approval. HOST Dry Carpet Cleaner is tested annually by Cleaning Research International in the U.K. HOST is approved for carpet cleaning and for spot removal.
- Carpet mill and fiber manufacturer approvals and recommendations including fifth generation nylon fibers.
- The HOST Dry Extraction Carpet Cleaning System was rated *excellent* compared to both Do It Yourself and professional carpet cleaning methods by the leading U.S. consumer testing magazine
- HOST and HOST SJ are sustainable and made from renewable resources HOST and HOST SJ are Green Seal certified: and are certified 100% Biobased by the USDA.
- Racine Industries, manufacturer of HOST, is recognized as a Champion with the EPA's Safer Detergent Stewardship Initiative. All products that we manufacture are made with surfactants that are classified by the EPA and EU as "readily biodegradable".
- HOST and HOST SJ contain no VOC's. (no petroleum solvents). HOST is a combination of water (mostly) and green cleaning chemistry.
- Switching to the HOST System will contribute to LEED points toward the USGBC Green Buildings program.
- HOST Dry Carpet Cleaner is manufactured in an EPA registered facility.
- HOST cleaning removes significant amounts of cat & dog allergen, mold, mold spores and dust mites from the carpeting. The Scientific research is peer reviewed and internationally recognized.\*
- HOST is arguably the most IAQ-friendly carpet cleaning system available...safe for people, pets and the environment.
- Approved for landfill, no special disposal requirements.
- Does not attract soil after cleaning.

- HOST is designed to enhance and clean all types of fibers -- Polyester, Triexta, Nylon, polypropylene (olefin), Wool, Sisal, Coir, Silk and Cotton.
- Available in 66 countries.

Used by professional carpet cleaners, BSC's, major schools, casinos, office buildings, healthcare facilities, property management, retail stores, government and hospitality establishments around the world.

\*The HOST® System of applying HOST Dry Carpet Cleaner to the carpet, brushing it through the carpet and then vacuuming up the HOST Dry Carpet Cleaner removes dirt and reduces allergens. Research studies have shown that one cleaning with the HOST System using HOST Machines reduces: Dust mites by 78%, Dust Mite Allergen by 75%, Cat Allergen by 85%, Mold Spores by 85%. EPA Establishment Number: 074202-WI-001.
